

Important Guidelines for Maximum Healing Efficacy

How to Take Homeopathic Sweet Pills (Globules)

- Do not touch pills with bare hands. Tip pills directly into bottle cap or paper fold and place on tongue.
- Allow the pills to dissolve slowly under your tongue. Do not chew or swallow with water immediately.
- Maintain a clean mouth: Avoid eating or drinking anything 15–20 minutes before and after taking medicine.

Substances to Avoid During Active Treatment

- Raw Onion & Raw Garlic (Strong pungent aromatics may reduce efficacy of certain remedies).
- Strong Coffee, Menthol / Strong Peppermint toothpaste or camphor balm right around medicine time.
- Tobacco, chewing gutkha, and excessive alcohol during your treatment course.

Safe Storage of Remedies

- Keep homeopathic vials tightly closed in a cool, dry place away from direct sunlight.
- Keep away from strong electronic magnetic fields (microwave, TV) and strong smelling perfumes or detergents.
- Homeopathic pills have prolonged shelf life when stored clean and dry.
